METALLOGRAPHY

AN INTERNATIONAL JOURNAL
ON MATERIALS STRUCTURE AND BEHAVIOR

Published in Association with the International Metallographic Society

Contents

Volume 21, 1988

H. Gong and N. J. Gu
The Compound Formation of Mechanism of Butterfly Martensite 1

S. P. Gupta and G. T. Parthiban
Discontinuous Precipitation and Coarsening of Lamellar Cellular Precipitate in Fe-Zn Alloys 11

W. Prantl
A Computer Program for Plotting Stereographic Projections 33

A. M. Tonejc and V. Kràsevec
On the Microstructure of Rapidly Quenched Co-10 wt.% TaC 41

T.-S. Liu, D. G. Harlow, and T. J. Delph
Stereological Analysis of Creep Cavities on Polished Sections 55

Y. Birol
Plastic Deformation Around Fatigue Cracks 77

Short Communications

C. K. Shui, W. T. Reynolds, jr., G. J. Shiflet, and H. I. Aaronson
A Comparison of Etchants for Quantitative Metallography of Bainite and Martensite Structures in Fe-C-Mo Alloys 91

R. J. Brettell
A Modified Cold Mounting Technique 103

Res Biblia 109

Announcements 122

T. S. Chin, K. S. Ho, W. T. Tsai, R. D. Chang, D. S. Tsai, and Y. H. Chang
Novel Method for Studying the Complex Microstructure of a $Sm(Co/Fe/Cu/Zr)_{7.3}$ Permanent Magnet Alloy 125

N. N. Acharya and P. G. Mukunda
Metallography of Copper-Tin Alloys 137

O. A. Hilders and M. G. Santana
Toughness and Fractography of Austenitic Type 304 Stainless Steel with Sensitization Treatments at 973 K 151

M. N. C. Ijomah and F. N. Okoyeh
Microstructure and Deformation Resistance of Quinary Pb-(Al, Mg, Sn, Li) Alloys 165

J. Menon and C. Suryanarayana
Metallography of a Melt-Quenched Aluminum–Cobalt Alloy 179
S. C. Tjong and N. J. Ho
Microstructural Development in a Duplex $FeAl_{10}Mn_{29}C_{0.4}$ Alloy 199
V. Zinoviev, E. M. Schulson, and I. Baker
Microstructure of Ni_3Al Ingots Containing Boron 207
E. Otero, M. C. Merino, A. Pardo, and M. V. Biezma
Improved Metallographic Preparation of IN-657 Alloy
by High Temperature Oxidation 217

Short Communications

W. Prantl
Simple On-Line Method for Finding Low-Index Zone Axes in TEM 227
A. ul Haq
Simple Technique for Revealing Prior Austenite Grain Boundaries in CrMoV
Turbine Rotor Steels 233
Table of Contents for *Praktische Metallographie* 238

Announcements 239

A. M. Gokhale
Stereology of Plane Convex Loops Distributed in the Three-Dimensional
Microstructure 241
M. Nishida and C. M. Wayman
Electron Microscopy Studies of the "Premartensitic" Transformations in an
Aged Ti-51at%Ni Shape Memory Alloy 255
M. Nishida, C. M. Wayman, and A. Chiba
Electron Microscopy Studies of the Martensitic Transformation in an Aged
Ti-51at% Shape Memory Alloy 275
Xianying Meng and Derek O. Northwood
A TEM Study of Precipitates in an Al-Mn-Si Alloy 293
M. Tacikowski, P. Benaben, and A. Kobylanski
High Resolution Autoradiography for Revealing Sulphur Segregation at
Austenite Grain Boundaries 317
George Vander Voort
Influence of Magnification on Feature-Specific Image Analysis
Measurements 327
Richard K. Duke, Po-Shou Chen, and Roy C. Wilcox
Effects of Thermal Aging on 12Cr-1Mo Steel 347

Announcements 361

Table of Contents for *Praktische Metallographie* 363

T. S. Hahn and A. R. Marder
Effect of Electropolishing Variables on the Current Density–Voltage
Relationship 365

C. Marchionni and J. M. Chaix
A Fractional Dimension Method for Characterizing WNiFe Presintered Materials 377
V. Zinoviev, E. M. Schulson, and I. Baker
The Microstructure of Extruded Ingots of Ni_3Al Containing Boron 391
L. T. Shiang and C. M. Wayman
Maraging Behavior in an Fe-19.5Ni-5Mn Alloy. I: Precipitation Characteristics 399
L. T. Shiang and C. M. Wayman
Maraging Behavior of an Fe-19.5Ni-5Mn Alloy. II: Evolution of Reverse-Transformed Austenite During Overaging 425
B. Radhakrishnan and R. G. Thompson
A Quantitative Microstructural Study of Intergranular Liquation and its Relationship to Hot Cracking 453
D. B. Rayaprolu
Methods for Determining Particle Distribution Parameters from Extraction Replication Data 473
Author and Title Indexes for 1988 481
Table of Contents for *Praktische Metallographie* 484
